

PROTINUS

SEED NUTRITION PRODUCT

Because a healthy start can make a world of difference™

PROTINUS™ Seed Nutrition Product delivers early plant health as evidenced by earlier and more even germination, increased early plant growth, and enhanced root growth.

The above chart¹ demonstrates the positive impact of PROTINUS on early plant growth and root growth. Enhanced above ground and root growth early in the season helps young plants better compete with weeds, and find needed nutrients and moisture. Getting plants off to an early, healthy start is critical to ensuring the crop reaches its full genetic potential.

For more information about PROTINUS, please call 204-237-9653, or visit our website www.protinus.org.

** Plants were weighed and root quantitative measurements recorded. Root length and projected root area were measured using WinRhizo® scanning technology and software. Results are compiled from over 80 company and 3rd party research trials including, but not limited to; corn, cotton, soybeans, small grains, forages and vegetables.*
