

# Corn & Wolf Trax DDP Micronutrients

**Key Micronutrients That May Be Deficient:**  
Manganese

Zinc

**Factors Affecting Availability:**

Soils with high iron content (for manganese)

High pH soils or high levels of phosphate and iron (for zinc)

**Micronutrients Roles and Benefits:**

Key role in the enzymes systems involved with carbohydrate and nitrogen metabolism (for manganese)

Essential for sugar regulation and enzymes that control plant growth (for zinc)

## Why Wolf Trax® DDP Products?

**Innovation** - Ground-breaking foliar technology, exclusive to Wolf Trax, provides superior application and uptake of micronutrients.

**Superior Application** - The unique DDP® (Dry Dispersible Powder) formulations mix more easily and more quickly, leading to fewer application problems, and improved effectiveness in solving nutrient deficiencies.

**Improved Uptake** - Wolf Trax products are the only micronutrients offering exclusive Dual Action™ activity, providing both immediate uptake and continuous feeding over time.

**Flexible and Convenient** - Wolf Trax DDP technology greatly reduces the volume of product and amount of handling required, with greater storage convenience.

**Applications of zinc and manganese ensure availability throughout the growing season**

## Foliar Label Use Rates for Wolf Trax DDP on Corn

Product	Rate	Timing
Wolf Trax Manganese DDP (33%)	Use 4 oz/acre (280 grams/ha)	Apply 4-6 weeks after planting. Repeat if necessary at one-month intervals.
Wolf Trax Zinc DDP (62%)*	6.5 oz/acre (450 grams/ha)	Apply in early spring. Repeat application if necessary.

\* When using zinc as a foliar, a surfactant is required

**For more information on the complete line of innovative Wolf Trax products contact your local retailer, or call 204-237-9653**

Precise rates and production application utilizing any Wolf Trax products may be calculated using soil tests, tissue tests and efficiency factors. Not all products are registered for all uses in all markets. Contact your local agronomist or call Wolf Trax for more details.
