Wolf Trax Zinc DDP Micronutrient Mixed With Liquid Fertilizer

Mixing Note:

Always add the 10-34-0 to the water/zinc/compatibility agent mixture; do not add in reverse order

Compatibility Agent:

Mix compatibility agent with water at a rate of 2% of water volume (ie. 24 oz compatibility agent with 10 gallon of water)

Procedure For Storage:

Mix compatibility agent with water at above rate

Slowly add Wolf Trax® Zinc DDP® to a maximum rate of 4 lbs per 10 gallons of water

Add a minimum of 9.5 gallons of 10-34-0 to 0.5 gallons of the water/zinc/compatibility agent mixture*

This mixture stays in suspension indefinitely at temperatures above 50°F

This product contains **1.24 lbs of actual zinc** per 10 gallons

Procedure For Nurse Trucks (immediate use):

Mix compatibility agent with water at above rate

Slowly add Wolf Trax Zinc DDP to a maximum rate of 8 lbs per 10 gallons of water

Add a minimum of 9.5 gallons of 10-34-0 to 0.5 gallons of the water/zinc/compatibility agent mixture*

This product contains **2.48 lbs of actual zinc** per 10 gallons

Compatibility Test:

Due to the varying quality of 10-34-0 the use of a compatibility test is required

Compatibility Test Rates:

Storage

10.0 oz water/compatibility agent mixture

¾ oz Wolf Trax Zinc DDP

1.5 gallons 10-34-0

Nurse Truck

10.0 oz water/compatibility agent mixture

1 ¼ oz Wolf Trax Zinc DDP

1.5 gallons 10-34-0
